I Gifted

IColor 550

The Swiss Army knife of the printing world is here. The Uninet IColor 550 combines ultimate versatility with a heavyweight performance for short to mid-run transfer production of garments, hard surfaces, marketing customization and merchandising materials – all at an affordable cost. Your whole business now comes in a single box.

Performance
Jill of all trades.

If the **IColor 550** were a woman, she would already have the corner office and had finished running a marathon. Put simply, the IColor 550 is as good and as comprehensive as toner-based digital printing gets. It's not a single machine but five different printers in one: (1) White Overprint for textile and apparel applications, (2) White Underprint for non-transfer applications, (3) Dye Sublimation applications, (4) Fluorescent colors and (5) Conventional CMYK transfers and Clear Toner.

Gifted
The Swiss Army Knife of the printing world.

If you are in the business of transfer and non-transfer applications, with the IColor 550, you can afford to think big. Create digital, long-lasting transfers – fast and easy – with vivid colors and proven durability, featuring the brightest, most dense and opaque white toner on the market. And when you combine it all with Uninet IColor's Transfer Paper, the result is unparalleled image quality across a wide variety of sizes and textures for multiple applications. You get it all, except for the maintenance associated with ink-based printing systems.

Features
One quick-witted lady.

The IColor 550 features Intel's 1.46 GHz processor, which makes it five times faster than any previous Uninet IColor or competing model. Not only is it speed-light fast, it has double the resolution, delivering up to 1200 x 1200 dpi versus 600 x 600 dpi of our previous models and the competition. You can effortlessly print and press graphics in full color and white onto virtually any dark or light-colored textile or substrate, ranging from cotton, polyester, leather, vinyl, ceramic, wood, metal and more. Personalize any textile or hard surface quickly and easily. Finally, the IColor 550 comes packed with the **IColor ProRIP Software**, allowing for up to 50% less white toner usage, advanced color management, image manipulation and rasterization on the fly. And if that weren't enough, it also optionally includes IColor's exclusive SmartCUT Software for printing oversized images like tabloid and larger.

Versatility
One part lady. Two parts tough-cookie.

The Uninet IColor 550 was engineered to accomplish both transfer and non-transfer applications without the need for your business to purchase separate printers to accomplish each function. You get both, extreme versatility and heavy-weight performance just by swapping back and forth between conventional and specialty cartridges. The IColor 550 will deliver professional and high-quality image reproduction right off the cuff. You also have the option to upgrade to Uninet's **IColor Specialty Toner Kits** for enhanced printing capabilities.

IColor 550

Digital Color + White Transfer Printer

System Specifications

Print Speed:	Up to 8 ppm on transfer media; up to 26 ppm on standard media
Processor:	Intel 1.46GHz
Duty Cycle:	Up to 75,000 pg/mo.
Duplex:	Standard
Memory:	2Gb RAM
Resolution:	1200 x 1200 dpi
Emulation:	PostScript 3
Operating Systems:	Standalone and network: Windows 7/8/10 (x32 & x64); macOS X 10.4 and higher (Printer only, RIP Software is for Windows PC's only)
iColor ProRIP Software	Windows required
Interfaces:	10/100–TX Ethernet, High Speed USB v2.0
Paper Capacity:	Standard 100 sheets; handles transfer media, card and mailing label stock
Paper Cassette:	500 sheets, Legal/Letter/Universal
Paper Sizes (Min/Max):	Multi-purpose Tray handles up to 100 sheets: 3" x 5" to 8.5" x 49.6"; Paper Cassette: 5.8" x 8.3" to 8.5" x 14"
Paper Weight:	Multi-purpose Tray: 16lb. bond to 59lb. index (60 to 220gsm); Paper Cassette: 16lb. bond to 43lb. index (60 to 163gsm)
Overall Dimensions (W x D x H):	15.8" x 18.9" x 15.9" (40cm x 48cm x 40.4cm)
Weight:	69lb. (29kg)
Power:	120V & 220V models available

System Includes

The **IColor 550** comes standard with five toner cartridges for full color and white printing (CMYW plus True Black), also with the ability to swap the white cartridge for black for non-transfer applications.
**IColor ProRIP Transfer Software** for white overprint and underprint functionality, as well as color changes, image manipulation, and rasterization on the fly!

Gutemberg & The Origins Of Uninet

The mythical tale goes like this: inventor Johannes Gutemberg began experimenting with printing in Strasbourg, France, in 1440. By 1450, he had a printing machine ready to use commercially. In order to make the type available in large quantities, Gutenberg applied a process known as replica-casting while using his own ink devised to affix to metal rather than wood.

Our Story

545 Years Later

In the mid-90s, in Los Angeles, California, a slightly disaffected Architect and soccer appassionato, found gold in repurposing toner cartridges which later evolved into white-toner cartridges promising to revolutionize the printing industry for an additional 545 years.

Infused by a mist of sudden excitement, he dreamed of a line of products that would prevent tons of plastic waste from going into landfills. He soon realized he had yet to find a printing machine able to fit them. Ironically, he was jammed. As opposed to Gutemberg, he had the ink. Now, he just needed to build the printer. In honor of Gutemberg's deeds (although, not a single reference to Gutemberg can be found) he named his company **UNINET** and began yet another chapter of developing superior printing products.

Reprinting The Future

Fast forward to 2012. The dawn of the all-digital era now called for less waste with just in time and on-demand short runs prints. **UNINET** quickly answered this higher calling with **IColor**, its On-Demand Solutions unit enabling users to print or re-print one or even a thousand pieces with minimal effort and waste, including some of the most sought-after lines of Transfer and Label printing solutions in the marketplace.

CEO and Founder of **UNINET, Nestor Saporiti** vows, "As a kid, I had of all these ideas for creating things that would improve people's lives. Today, what drives me is still the same: supporting dreamers like me around the world. It's never too late to create your dream business, and that's what **IColor** is here for."

Your future. Our business.

UNINET **IColor**
