UNINET® DTF Xpress™ Transfer Printer Paired with the DTF™ Horizontal 17 Shaker™

UNINET® DTF Xpress™ Transfer Printer Paired with the DTF™ Slim Shaker™ Available in 17” and 24” Widths.

Printing System Technical Specifications

- **PRINT SPEED:** Up to 75 Sq ft (42 Linear ft) / hr
- **RESOLUTION:** 1200 x 1200 dpi
- **PRINthead:** Eight industrial-grade printheads
- **OPERATING SYSTEM SUPPORTED:** Windows® 10 & Windows® 11
- **INTERFACES:** Ethernet, USB Memory (Type A) and Wi-Fi.
- **PAPER CAPACITY:** 328 ft Transfer Film Roll: 17 inch wide
- **RATED CURRENT:** 7A
- **FILM ROLL SIZE (MIN / MAX):** 17 inches
- **DIMENSIONS (WxDxH):** 49" x 31.5" x 21.25"
- **WEIGHT:** 238 lbs
- **POWER:** 120V

Meet the UNINET® DTF Xpress™
The Most Reliable & Auto-Maintenance
DTF Transfer Printer for High-Volume Production.

Advance your business with the best-in-class
DTF solution on the market.

UNINET®
DTF Xpress™
Print Faster. Smarter. Cleaner.

Elevate Your Business Future with Unmatched DTF Performance

Automatic Maintenance DTF Printing Innovation

- **Advanced Automatic Wet Cap & Wiper Cleaning System Technology**

This **first-of-its-kind system** uses patented Automatic Wet Cap & Wiper Cleaning Technology to **keep nozzles clog-free** and printheads performing at their best. **Dual cleaning cartridges** and one-touch automation **eliminate manual maintenance**, reducing downtime, preventing banding, and extending printhead life for smooth, **worry-free production**.

17" Wide Format Continuous Printing Capability

- **High-Speed Output that Boosts Productivity**

Produce **superior-quality transfer prints** for customized apparel, garments, accessories, and more. Supports **medium to large volume** jobs without compromising detail, color vibrancy, or consistency.

Built for Speed & Volume

- **8 Industrial-Grade Printheads**

Engineered for enhanced reliability and high-speed performance. Our industrial-grade printheads **outperform standard film-type piezo heads found in other machines**, delivering superior output without sacrificing quality.

Clean & Consistent Output

- **Sealed Ink System**

Its turbo-charged Seal Ink System prevents ink contamination and evaporation, delivering mess-free performance and stable print quality, so you can focus on growing your business instead of cleaning up.

Independently Controlled 4-Zone Heater System

Achieve flawless results with our **precision-engineered four-zone heater**, designed for optimal film transfer printing. Each zone operates independently to ensure rapid, **even drying**, keeping color and white ink layers sharp and distinct, regardless of ink volume.

Reimagine Your Workflow with the Most Reliable DTF Transfer Printer Yet.

Enjoy smart features that make a big impact.

Compact Design, Big Power

Save space without sacrificing productivity, it fits through standard 32" doorways —**perfect for small studios or high-demand production floors**.

Plug & Play Simplicity

No electrical upgrades are required—**plug it in and start printing**.

- **Advanced RIP Software** and Driver Software.

- **7-inch Touchscreen Display**—Easy navigation and print job management.

- **Wi-Fi Connectivity**—Compatible with Ethernet, WiFi, or USB memory sticks.

- **1200x1200 DPI Print Resolution**— Sharp and supreme-quality prints.

- **Inline-Transfer Film Cutting**—Sheet cutting, and long-run settings for optimized production, reduced film waste, and cost savings.

- **Status LED Light and Alarm**—The bright LED indicator.

- **Dual Feeding Mechanism**— Dual feeding system features front and back rollers, keeping the film transfer paper flat and under consistent tension.

- **Automated Unwinder Unit**—Motorized unwinder makes loading and unloading a breeze.

- **Safety Mechanism**—Integrated safety system monitors conditions, including temperature, humidity, and electrical and mechanical performance.

- **Temperature and Humidity Monitor**—Features six independent temperature and humidity sensors that continuously assess the ambient environment and more.

- **Automated Vacuum Heating**

- **Water-Repellent Coatings on its Electrical Parts**—Shielding them from ink overspray damage.

Maximize your Printing Potential to New Heights.

Bring your ideas to life faster with UNINET®'s complete DTF Xpress™ system—featuring printers, **RIP software, consumables, and everything you need** for high-quality garment decoration. Upgrade your business and take your creativity to the next level!

Printing System Includes
