# YOUR ON-DEMAND DIGITAL LABEL FINISHING SOLUTION!

The UniNet iColor® LF 200 is a high-performing and compact digital die-cutter and laminator label finishing system incorporating die cutting, slitting, waste removal and rewinding automated capabilities. It combines lightweight versatility with heavyweight performance to provide seamless finishing for any type of short-run label production.

The iColor® LF 200 is small but mighty, and comes equipped with plotter drag knife technology to deliver the most reliable and maximum precision registration for labels of any shape and cutline, creating endless possibilities and product labels that will stand-out on the shelf. It also includes the option of lamination for enhanced visual appearance, protection and durability of your product label production.

## BRINGS TOGETHER SMALL FOOTPRINT AND MIGHTY TECHNOLOGY

The UniNet iColor® LF 200 is the perfect complement to the iColor® 200 Inkjet Digital Label Press and most narrow-web label printers on the market. The LF 200 finisher was developed to deliver optimum performance, versatility, and value by eliminating the need to purchase dies for different shapes and sizes, reducing turnaround times and costs associated with outsourcing.

## FEATURES AND ADVANTAGES

- Create customized shapes and sizes to suit label needs
- Supports roll widths up to 6.25" (158.75 mm) wide
- Plotter drag knife technology with easy adjustability and slit web rewind
- Compatible with most roll-to-roll narrow web label printers
- User-friendly control panel for easy navigation through menus and functions
- Impressive speeds and precision registration to produce short-run labels with reliability and at the lowest cost
- Small footprint, a perfect complement to the iColor® 200 Inkjet Digital Label Press!
